ई-कुटेशन आमन्त्रण सूचना

बुलन्दशहर खुर्जा विकास प्राधिकरण, बुलन्दशहर द्वारा पत्रांक 8187/वि0प्रा0/अभि0अनु0/25-26 दिनांक 09.02.2026 के अन्तर्गत बुलन्दशहर खुर्जा विकास क्षेत्र में पार्कों एवं रोड के सौन्दर्यीकरण हेतु बुलन्दशहर खुर्जा प्राधिकरण, द्वारा प्रतिष्ठा एवं अनुभवी फर्मों/ विक्रेताओं से शहरी सौन्दर्यीकरण एवं विकास कार्यों से सम्बन्धित विशेष Non DSR वस्तुओं/संरचनाओं/ornamental कार्यों यथा स्टोन वर्क, FRP म्यूरल, स्ट्रीट फर्नीचर स्कल्पचर, लाईटिंग, play-Equipments आदि की डिजाईन आपूर्ति निर्माण एवं स्थापना हेतु ई-कुटेशन आमन्त्रित की गयी थी उक्त ई-कुटेशन को अपलोड करने की अंतिम तिथि 17.02.2026 को अपरिहार्य कारणों से दिनांक 21.02.2026 तक किया जाता है। उक्त ई-कुटेशन अगले कार्य दिवस अर्थात दिनांक 23.02.2026 में पूर्वान्ह 11:00 बजे खोली जायेगी। कार्य से सम्बन्धित विवरण व अन्य शर्तें <https://bkdaup.com/> पर देखी जा सकती है।

अधीक्षक अभियन्ता

बुलंदशहर-खुर्जा विकास प्राधिकरण

बुलंदशहर खुर्जा विकास प्राधिकरण द्वारा प्रतिष्ठित एवं अनुभवी फर्मों विक्रेताओं से सेरी सौंदर्यीकरण शहरी सौंदर्यीकरण एवं विकास कार्यों के सम्पादन हेतु संबंधित विशेष Non-DSR आइटम्स/वस्तुओं/संरचनाओं/कार्यों की डिजाइन, आपूर्ति, निर्माण एवं स्थापना हेतु ई-कोटेशन आमंत्रित किये जाते हैं। उक्त हेतु प्रस्तावित महत्वपूर्ण तिथियां निम्नानुसार है-

महत्वपूर्ण तिथियां		
क्र० सं०	विवरण	तिथि / समय
1	ई-कोटेशन प्रकाशन की तिथि	10 फरवरी 2026
2	ई-कोटेशन जमा करने की अंतिम तिथि व समय	21 फरवरी 2026
3	ई-कोटेशन खोलने की अंतिम तिथि वह समय	23 फरवरी 2026 अपराह्न 01:30 बजे

ई-कोटेशन जमा करने की प्रक्रिया, शर्तें एवं नियम: -

- कार्य से संबंधित विस्तृत **BOQ**, तकनीकी विनिर्देश, शर्तें एवं संदर्भ चित्रों का विवरण संलग्नक-अ के अनुसार है एवं इच्छुक फर्मों/विक्रेता इनका अध्ययन कर अपनी वित्तीय दरें प्रस्तुत करेंगे।
- इच्छुक एवं पात्र फर्म/विक्रेता अपनी वित्तीय कोटेशन केवल **पासवर्ड-प्रोटेक्टेड PDF फ़ाइल** के रूप में प्राधिकरण द्वारा ई-मेल **bdabsr10@gmail.com** पर भेजेंगे।
- पासवर्ड-प्रोटेक्टेड PDF फ़ाइल निर्धारित अंतिम तिथि प्राधिकरण को प्राप्त हो जानी चाहिए।
- महत्वपूर्ण निर्देश: कोटेशन भेजते समय PDF फ़ाइल का पासवर्ड साझा नहीं किया जाएगा।
- अंतिम तिथि एवं समय के पश्चात**, सभी आवेदक अपनी-अपनी **PDF फ़ाइलों को खोलने हेतु पासवर्ड** अलग से ई-मेल द्वारा प्राधिकरण को, सक्षम प्राधिकारी द्वारा निर्धारित समय पर, साझा करेंगे।
- निर्धारित तिथि एवं समय के पश्चात प्राप्त किसी भी कोटेशन पर विचार नहीं किया जाएगा।
- सभी दरें GST रहित (Exclusive of GST) उद्धृत की जाएंगी।
- GST का भुगतान शासन के नियमानुसार अतिरिक्त देय होगा।
- सभी आपूर्ति/कार्य अधिकारी-प्रभारी / अभियंता-प्रभारी के निर्देशानुसार किए जाएंगे।
- गुणवत्ता, विनिर्देश एवं निष्पादन संबंधी निर्णय प्रभारी अधिकारी का अंतिम एवं बाध्यकारी होगा।

बुलंदशहर-खुर्जा विकास प्राधिकरण

- प्राधिकरण को बिना कोई कारण बताए किसी भी या सभी ई-कोटेशन को आंशिक अथवा पूर्ण रूप से अस्वीकार करने का अधिकार सुरक्षित रहेगा।

SN	Description	Reference Image	Quantity	Unit	Unit Rate (INR)
1	Supply and Installation of FRP Sculptures Depicting Surya Namaskar Asanas Providing, designing, fabricating, supplying, transporting, and fixing FRP (Fibre Reinforced Plastic) sculptures depicting Surya Namaskar (Sun Salutation) asanas, comprising multiple human figures in sequential yoga postures, matching the poses, arrangement, and overall appearance as indicated in the reference image provided in the RFP, with individual sculpture height not exceeding 5 feet and other dimensions in appropriate proportion and scale. The sculptures shall be anatomically accurate, made of high-quality FRP with resin and glass fibre reinforcement, suitable for outdoor installation and resistant to weather, moisture, and sunlight. The surface shall be smoothly finished and painted with exterior-grade, UV-resistant paints in approved colour and finish. Each sculpture shall be mounted on an individual pedestal/base, including all necessary anchors, bolts, and fixing arrangements. The work shall include modelling, mould preparation, FRP fabrication and finishing, transportation, lifting, installation, scaffolding/staging as required, finishing, touch-ups, and site cleaning, complete in all respects, as per approved drawings and directions of the Engineer-in-Charge.		12.00	Nos	
2	Providing, designing, fabricating, supplying, transporting, erecting and commissioning a large perforated metal sculptural installation in vase form, complete in all respects, as per approved drawings, design intent and directions of the Engineer-in-Charge. The sculpture shall be of approximate overall height 5.0 m with a maximum diameter ranging between 2.0 m to 3.0 m, designed as a landmark feature for installation in road median / roundabout / public space. The sculpture shall be fabricated using structurally stable metallic material such as mild steel / corten steel / stainless steel (SS 304 or SS 316), formed into curved panels with decorative perforated patterns (laser cut / CNC cut). The structure shall comprise an internal load-bearing framework made of MS circular pipes / RHS sections / ribs and stiffeners, designed to withstand self-weight, wind loads and vibration, ensuring overall structural stability and long-term performance in outdoor conditions. All metal surfaces shall be properly cleaned, treated and coated, including primer (zinc-rich / epoxy primer) and finished with exterior-grade PU / powder coating / approved paint system in the approved colour and shade, providing corrosion resistance and durability. Where specified, the sculpture shall include integrated internal lighting fixtures (LED) suitably housed and concealed, complete with wiring, access panels and provisions for maintenance. The sculpture shall be securely fixed over RCC foundation of approved design using base plates, anchor bolts and grouting, ensuring perfect		1	Job

	vertical alignment, stability and safety. The item shall include all materials, fabrication, welding, cutting, finishing, transportation, erection, testing, commissioning, touch-ups and site cleaning, complete in all respects, to the satisfaction of the Engineer-in-Charge.				
3	Providing, designing, fabricating, supplying, transporting, erecting and commissioning a landmark gateway / median sculptural structure with dimensions shown in the reference image, complete in all respects, above foundation level, as per approved drawings, design intent and directions of the Engineer-in-Charge. The scope shall include structural steel superstructure comprising central mast and cantilevered wing arms, fabricated from structurally stable metallic material (mild steel / structural steel) using plates, pipes, box sections, stiffeners and ribs, designed to safely withstand self-weight, wind loads and vibration. All fabrication shall be carried out by cutting, bending, welding and grinding, with proper shop drawings and trial assembly prior to erection. The item shall further include decorative Ceramic Waste Art façade over the primary structure using FRP / aluminum / laser-cut MS / GFRC / approved materials, fixed on secondary framing, along with tension elements / cables (structural or architectural) wherever required. Provision and fixing of authority name signage in approved material and finish shall also be included. All metal surfaces shall be properly cleaned and treated with zinc-rich / epoxy primer and finished with exterior-grade PU / powder coating / approved paint system in approved colour and shade, providing long-term corrosion protection. The item shall include integrated lighting fixtures (LED) with concealed wiring, access for maintenance, testing and commissioning. The work shall include transportation, hoisting, erection using cranes, alignment, bolting/welding to pre-installed anchor bolts, final finishing, testing and commissioning, complete in all respects. The RCC foundation and pedestal are excluded and shall be measured and paid separately under DSR items.		1	Job

4	Ceramic waste wall art and painting on built boundary wall Providing, designing and fixing ceramic waste wall art over existing boundary wall using broken ceramic tiles, pottery shards and other approved ceramic waste materials, arranged in artistic mosaic / relief patterns, complete in all respects, as per approved design and directions of the Engineer-in-Charge. The work shall include surface preparation of the existing wall, application of suitable bonding coat, fixing of ceramic waste pieces using polymer-modified adhesive / epoxy mortar, joint filling with weather-resistant coloured grout, and final finishing suitable for outdoor conditions. The item shall also include painting of all wall surfaces not covered with ceramic waste art using exterior-grade weather-resistant paint in approved colour and finish. All materials shall be colourfast, non-toxic and resistant to weathering, moisture and fading. The rate shall include all materials, labour, tools, scaffolding, handling, fixing, finishing, painting, cleaning and disposal of debris, complete in all respects. Lighting fixtures and electrical works are excluded. The overall length of the wall is 230 meters and height of the wall is 1.5 meters.		345	Sq.m.	
5	Bus Passenger Shelter Supply and Fixing of Bus Passenger Shelter of 9mx2.4m size with SS 304 grade tubular structure and trussed roof with 10mm thick multiwall polycarbonate sheet with 35% light transmission of make, GE plastics with 5 years warranty fixed on top of roof including tubular bench made of SS304 pipr plate fixed between the vertical posts with seating capacity of 12 persons with Name Plate with necessary information format on pasted vinyl of LG make and back lit aluminum signage's 6063-T5 with in built strong clipping frame arrangement for holding the flex or digital media along with all necessary cleats and corners with SS railing and dustbin and SS304 grade left right top signage os round shape all complete as per direction of Engineer-in-charge.(LMR)		1	No.s

6	Vending Zone Shelter Providing, constructing and installing roadside vending zone shelter of approved design and dimensions, comprising a reinforced cement concrete (RCC) base/platform with proper foundation, finished with smooth cement plaster and/or anti-skid flooring, complete in all respects. The shelter shall be enclosed/covered with a GI/steel framework structure and provided with corrugated GI/colour-coated tin (tean) sheet roofing of approved gauge, including necessary bracing, purlins and supports to ensure stability and durability. The structure shall be designed to protect vendors from sun and rain and shall include proper drainage slope, edge flashing and fixing accessories. All steel members shall be treated with anti-corrosive primer and finished with enamel/PU paint of approved shade. The work shall include excavation, concrete work, fabrication, transportation, erection, anchoring, alignment, finishing, and all labour, materials, tools and incidentals complete, as per approved drawings and directions of the Engineer-in-Charge. (3.0 m × 3.0 m × 3.0 m) (L × W × H)		15	No.s	
7	Aesthetic Treatment of Entry Gate Structure with Ceramic Waste Artwork Providing and fixing decorative ceramic waste art finish on the proposed entry gate structure, including collection and preparation of ceramic waste pieces, cutting, shaping, fixing with suitable adhesive/mortar, grouting, finishing, protective coating, scaffolding, labour, tools, and all incidental charges complete, as per approved design and directions of Engineer-in-Charge.		1	Job

	weatherproof, translucent and durable roofing and cladding system, with colours and pattern as per approved design and reference image. The scope shall include framing and finishing of open arch portions, edge trims, sealing, transportation, hoisting, erection, alignment, scaffolding/staging, finishing, cleaning and all incidental works complete. Civil works including amphitheatre seating, flooring, foundations and substructure are excluded and shall be measured and paid separately.				
39	Providing and Fixing Coloured Polycarbonate Tunnel Seating Pavilion Providing, designing, fabricating, supplying, transporting and erecting a linear semi-cylindrical (tunnel-type) covered seating pavilion of approximate size 10 m × 2.5 m × 2.5 m (L × W × H), with configuration and appearance as per reference image and approved drawings, complete in all respects above foundation level and as directed by the Engineer-in-Charge. The work shall include fabrication and erection of a structural steel framework comprising curved steel ribs/arches at regular spacing (approx. 1 m c/c), longitudinal members, bracings, base plates, anchor bolts, stiffeners and all connection hardware, fabricated from MS/structural steel sections by cutting, bending, rolling, welding and grinding, including primer and exterior-grade protective coating complete. Providing and fixing multicolour UV-stabilized polycarbonate sheets of approved thickness, arranged in coloured translucent panels and fixed over the curved framework using aluminium/GI profiles, gaskets, sealants and fasteners, complete to achieve a weatherproof and durable roofing and cladding system suitable for outdoor conditions. Providing and installing integrated seating within the pavilion formed from MS framing and finished with wooden planks / WPC / approved material, including supports, fixing, finishing and edge treatment complete. The item shall include transportation, hoisting, erection, alignment, scaffolding/staging as required, finishing, cleaning and all incidental works complete. Note: Foundations, flooring and other civil works are excluded and shall be measured and paid separately.		1	Job

40	Providing and Fixing Coloured Walkway Tunnel Providing, designing, fabricating, supplying, transporting and erecting a semi-cylindrical pedestrian walkway tunnel of approximate size 18 m × 3 m × 3 m (L × W × H), with configuration and appearance as per reference image and approved drawings, complete in all respects above foundation level and as directed by the Engineer-in-Charge. The work shall include fabrication and erection of a structural steel framework comprising semi-circular curved ribs/arches at regular spacing (4-5m), longitudinal members, bracings, base plates, anchor bolts and all connection hardware, fabricated from MS/structural steel tubular sections by cutting, bending, rolling, welding and grinding, including primer and exterior-grade protective coating complete. Providing and fixing multicolour UV-stabilized polycarbonate sheets of approved thickness, arranged in coloured translucent panels and fixed over the curved framework using aluminium/GI profiles, gaskets, sealants and fasteners, complete to achieve a weatherproof and durable roofing and cladding system suitable for outdoor conditions. The item shall include transportation, unloading, hoisting, erection, alignment, scaffolding/staging as required, finishing, cleaning and all incidental works complete. Note: Landscaping, paving, foundations and other civil works are excluded and shall be measured and paid separately.	  Indicative Plan for Placing Steel Frames	1	Job

41	Coloured Circular Shaded Pavilion Providing, designing, fabricating, supplying, transporting and erecting a circular open pavilion shade structure of approximate size 6 m diameter × 3 m height, with configuration, proportions and appearance as per reference image and approved drawings, complete in all respects above foundation level and as directed by the Engineer-in-Charge. The work shall include fabrication and erection of a structural steel support system comprising vertical circular hollow section columns, circular roof ring beam, radial/secondary members, stiffeners, base plates, anchor bolts and all necessary connection hardware, fabricated from MS/structural steel tubular sections by cutting, rolling, bending, welding and grinding, including application of primer and exterior-grade protective paint/coating complete. Providing and fixing multicolour UV-stabilized polycarbonate sheets roof infill panels / tensile arranged in geometric patterned segments forming a flat circular roof, securely fixed to the steel framework using approved fasteners, clamps and fixing accessories, ensuring uniform finish, colour consistency, structural stability, weather resistance and public safety, complete in all respects. The item shall include transportation, unloading, hoisting, erection, alignment, scaffolding/staging as required, finishing, cleaning and all incidental works necessary to complete the structure. Note: Foundations, flooring, electrical works, furniture and landscaping are excluded and shall be measured and paid separately.		1	Job

42	Providing, fabricating, supplying, transporting and installing a decorative ornamental pot sculpture of approximate overall height about 7 feet (pot body approx. 5 feet height with decorative top approx. 2 feet) and maximum diameter about 4 feet, fixed over a masonry/RCC pedestal of approx. 3 feet height and about 3 feet width, complete in all respects, as per approved design and directions of the Engineer-in-Charge. The item shall include fabrication of structural framework, shaping, finishing, anchoring, transportation, erection and alignment at site, including all materials, labour, tools, fasteners and incidental works required for complete installation. Outer Surface Finish: The entire exposed outer surface of the pot and decorative elements shall be finished using Ceramic Waste Art, comprising broken ceramic tiles/pottery pieces arranged in artistic mosaic patterns, fixed with suitable adhesive/mortar, jointed, finished and cleaned, suitable for outdoor conditions, complete in all respects.		2	No.s	
43	Providing, supplying, transporting, installing and commissioning inflatable water roller units of approximate size 2.5m length × 3m diameter, suitable for recreational water activities, with configuration, material, and appearance as per reference image and approved specifications, complete in all respects and as directed by the Engineer-in-Charge. The work shall include high-strength transparent inflatable rollers fabricated from heavy-duty PVC/TPU material of approved thickness, UV-stabilized, puncture-resistant, waterproof and suitable for prolonged outdoor and water use, complete with integrated air chambers, sealed joints, internal connectors, and safety locking systems. Providing and fixing air-tight zippers / entry openings, internal harness or hand-grip arrangements, and external grip nodules or protrusions for traction and stability, including all safety features required for public use, complete in all respects. The item shall include inflation equipment (air blowers/pumps), anchoring or tethering arrangements (if required), testing for air leakage, operational demonstration, cleaning and commissioning, complete. Note: Water body preparation, floating platforms, life-saving equipment, supervision staff, electrical supply for blowers and operation & maintenance are excluded and shall be measured and paid separately.		2	No.s
